Natural Sciences

October 26 - 31 the students of Indrika Zeberina Kuldiga Primary School during the lesson of Natural Sciences met a student's father who is a bird watcher. He told the students about the importance of birds and especially the house starling in the cycles of nature. The students did a survey in Google Forms prepared by the subject teacher as well as learned how to use Google Lense in finding info about starlings and other

Natural Sciences

Mathematics

November 6-10, 2023 the 7th-grade students during mathematics lessons learned to recognize the shapes of geometric figures and do maths needed to make a starling house. The digital application Kahoot (UDL engagement) and Youtube (representation) were used in the learning. Parents and retired teachers of our school helped students during the lessons.

Mathematics

Computer science

<https://padlet.com>

During computer lessons students made project diaries by using Padlet App. Students worked in pairs and collaborated. They took photos and Videos of the project activities.

Design and technology

January 8 -18, 2024 during Handicraft lessons students prepared / sew wooden boards, which later will be used for constructing bird houses.

Design and technology

January 15 – 19 students made bird houses from the previously prepared boards.

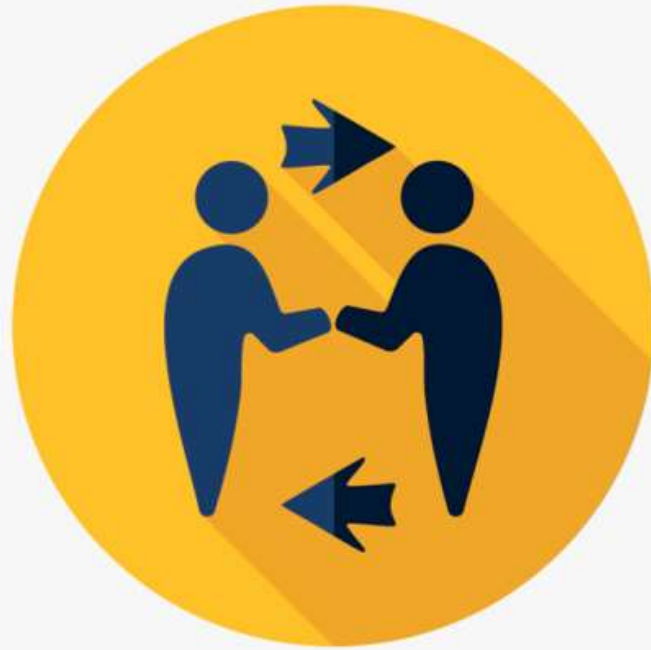

Design and technology

A video of the bird house construction process was made by using the App Stop Motion.

Project goal

Acquire SL and UDL skills

**Service
Learning**

Project aims

Eliminate generation gap

Learning empathy

Care for nature

Enjoy learning by doing and touching the fruit of labour

Thank you all for your
attention!
